Why Aurora & Naperville Homeowners Choose Creative Blinds & Drapes?

We are not a franchise or a big-box retailer. We are a family-owned, locally operated window treatment store based at 850 S Frontenac St, Aurora, IL, drawing on more than 23 years of installation expertise through our parent company, Creative Floors Inc. That depth of hands-on experience means every fitting is done right the first time.

Free In-Home Consultation	Professional Installation	Norman Window Fashions	23 Years of Experience
We bring samples to your home, measure every window and present design options at no cost.	Our window treatment installers handle fitting, adjustment and cleanup. You just enjoy the result.	Premium collection: 7 shutter lines, 5 blind styles, 6 shade types and 120+ drapery fabrics.	As a division of Creative Floors Inc., we have installed thousands of window treatments across the Fox Valley.

Complete Custom Window Treatment Services

Every window in your home serves a different purpose. A bedroom needs blackout capability. A kitchen needs moisture resistance. A living room needs elegance and light control. Our full range of custom window treatments covers every scenario, with professional window treatment installation included on every order.

Custom Shutters Classic shutters, composite, wood and specialty-shape options. Timeless light control with lasting durability. Seven collections from Norman Window Fashions, including motorized smart-home PerfectTilt. Custom Shades Honeycomb cellular, roller, roman and sheer shades. Energy-efficient triple-cell insulation, blackout opacity options and motorized operation with Alexa and Google voice control. Browse all shade collections on our Shades page	Custom Drapes & Curtains 70+ premium drapery fabrics and 54 sheer options. Blackout, sheer and light-filtering styles in 118-inch panel widths, with motorized drapery capability for a seamless smart-home experience. View all fabric options on our Curtains page

Motorized Window Treatments: Smart Control for Every Room

Motorized window treatments are the fastest-growing product category in the custom window covering market. Our **motorized window treatment installation service** covers roller shades, cellular shades, roman shades, shutters and drapery panels, all connectable to smart-home platforms.

Platform	Compatible Products at Creative Blinds & Drapes	How It Works
Amazon Alexa	Norman ShadeAuto roller and honeycomb shades, PerfectTilt shutters	Voice commands: "Alexa, raise the living room shades"
Google Home	Norman ShadeAuto roller and honeycomb shades, PerfectTilt shutters	Voice and app control via Google Assistant
Norman Hub App	PerfectTilt shutters, Woodlore Plus, Soluna Roller	Schedule, timer and remote control from any device
SmartDial Remote	Woodlore Plus shutters, Soluna Roller shades	Battery-operated wall remote, no hub required
Motorized Drapes	Custom drapery panels with motorized track	Touch button, app or voice control

NOTE

Our window treatment installers are trained in all Norman motorization systems. We handle wiring routing, hub pairing and app configuration as part of every motorized window treatment installation. You leave the consultation knowing exactly how to operate your new treatments from day one.

Professional Window Treatment Installation Service

Buying custom window treatments online or from a big-box store and installing them yourself carries real risk: uneven mounting, drilled mounting points in the wrong position or brackets that pull away from plaster. Our professional **window treatment installation service** eliminates every one of those risks.

What Our Window Treatment Installation Includes?

Every window treatment installation by Creative Blinds & Drapes covers the following steps, at no additional labour charge beyond the product price:

- Pre-installation site survey: our window treatment installer visits your home before fabrication, takes precise inside and outside measurements, checks for obstacles and confirms mounting hardware.
- Custom fabrication: your order is built to the exact measurements taken in your home, not to a standard size.
- Scheduled installation appointment: we arrive within the agreed time window, with all hardware, tools and the fabricated product.
- Professional mounting: brackets are anchored to studs or with appropriate wall anchors. Fascias, valances and decorative elements are fitted and levelled.
- Motorization setup (where applicable): hub pairing, app download, schedule programming and voice-command testing.
- Clean workspace guarantee: all packaging, offcuts and hardware residue are removed from your home before we leave.
- Walkthrough: we demonstrate every operating mode before the installer leaves.

Ask about our measurement guarantee. Because our window treatment installers measure your windows before fabrication, any fitting issue caused by our measurements is corrected at no cost to you.

How Our Window Treatment Installation Process Works?

The process is designed to be completely effortless for the homeowner. Six steps, one point of contact.

Step	What Happens	Your Role
1. Free Consultation	Our designer visits your home with full product samples. We discuss style, function, light control and budget.	Choose your preferred time. Show us the windows.
2. In-Home Measurement	Precise inside and outside measurements taken. Mounting options assessed. Motorization routing planned.	None. We handle the measuring.
3. Quotation	You receive an itemised written quote covering product, hardware and installation. No hidden charges.	Review and approve at your own pace.

4. Order Placed	Your custom window treatments enter fabrication. Lead time communicated at this stage.	None. We keep you updated.
5. Installation Day	Our window treatment installer arrives on time with your complete order, mounts, adjusts, programs motorization.	Be home for the appointment. Enjoy the result.
6. Follow-Up	We check in after 30 days. Any adjustment, levelling or operational issue is resolved free of charge.	Contact us if anything needs attention.

Motorization setup and training	Full service	Varies	DIY only
23+ years local installation history	Yes	Varies	No
Same-company sales and install	Yes, one contact	Sub-contracted	Sub-contracted

Frequently Asked Questions: Custom Window Treatments in Aurora & Naperville

What are custom window treatments and why do they cost more than ready-made options?

Custom window treatments are fabricated to the exact measurements of your windows, rather than cut from standard-size stock. A ready-made blind in a 35-inch width will not fit a 34.5-inch window correctly: it will either not sit flush or will have visible gaps. Custom fabrication ensures a precise fit, correct inside or outside mount depth, and your choice of fabric, opacity and operating system. The additional cost covers custom cutting, professional installation and the warranty protection that comes with a product built to specification.

How much do custom window treatments cost in Aurora, IL?

Pricing depends on product type, size, fabric choice and whether motorization is included. As a general guide: custom cellular shades start from approximately \$150-\$250 per window installed; wood shutters typically range from \$350 to \$700 per window depending on size; custom drapery panels vary based on fabric weight and panel width. Because every window is different, the most accurate way to get a price is through our free in-home consultation, where we bring samples and provide a written quote at no obligation.

What does professional window treatment installation include?

Our window treatment installation service includes pre-installation measurement, delivery of the fabricated product, professional mounting with the correct hardware for your wall type, levelling and adjustment, motorization programming where applicable, and a full walkthrough before the

installer leaves. There are no hidden labour charges: installation is included in every project. Our 30-day follow-up appointment covers any fine adjustment needed after you have lived with the product.

How long does window treatment installation take?

For most residential projects, installation takes between 1 and 3 hours, depending on the number of windows and the complexity of the product. Motorized window treatment installation with hub pairing and app setup adds approximately 30 to 60 minutes. We book dedicated installation slots and provide a confirmed arrival window, so your day is not disrupted by a broad waiting period.

Do you offer motorized window treatments in Naperville and the surrounding area?

Yes. We install motorized window treatments across our full service area, including Naperville, Oswego, Yorkville, Batavia, Geneva, St. Charles and Plainfield. Our motorized range includes Norman ShadeAuto roller and cellular shades, PerfectTilt smart shutters, Woodlore Plus motorized composite shutters and motorized drapery track systems. All are compatible with Amazon Alexa, Google Home and the Norman Hub app for schedule, timer and voice control.

Can you fit custom window treatments in unusual window shapes?

Yes. Our Norman Specialty Shapes shutter line is custom-crafted to fit arched, circular, triangular, angled and other non-rectangular windows to exact specifications. For shades and blinds on non-standard shapes, we assess the window during the in-home measurement visit and recommend the best solution for each configuration.

What is the lead time for custom window treatments?

Lead time varies by product and current factory schedule. As a general guide, most custom cellular, roller and roman shades require 3 to 5 weeks from order to installation. Custom shutters typically require 4 to 6 weeks due to the painted or stained finish process. We confirm the specific lead time at the point of order and schedule your installation appointment in advance so there is no delay once your product arrives.

Is a free consultation really free, with no pressure to buy?

Yes. Our in-home design consultation involves no fees and no obligation. Our designer brings product samples, measures your windows and provides a written quote. You have as much time as you need to decide. We never use high-pressure sales tactics: our consultation-first approach means we only proceed when you are entirely comfortable with the recommendation and the price.

Ready to See Custom Window Treatments in Your Home?

Free consultation. No obligation. Professional installation included on every order.
